Do you like VR ? Do you like to do things you'd never be able to do in real life ? Do you have 3 creds ? Well, then you probably should buy this game.. Simple but cozy experience with endless colorful bubbles.. This used to be a super kids friendly game, but now it wont start and are abandoned by the devs - too bad :-/. Very nice game to show to first time VR folks. Highly recommend to people who like colors lol.. Lovely little tool! Cheap, but without feeling as much. Good entry for beginner VR players, while still being fulfilling.. Needs more content but this is EA so that's understandable. Has the potential to be THE go

to demo for really young kids and those people who i demo to that just don't get it and can't seem to fathom how to use any controller functions. Can you bend your right forefinger? Can you wave the fan in your left hand? Yes?? Well, you can play this.. Nifty bubble physics, bonus if you're artistic. Changing my review after showing this to my parents, who are nearly 80 years old. They loved it and spent more time interacting with it than other, more complex demos I've shown them. A few minutes of 'gee that's nifty' entertainment and that's pretty much it. Good demo for youngsters or people very new to VR. A few more ways to interact with the particles or controls to adjust their behavior would be a nice addition.
